Applicant SIEMENS AKTIENGESELLSCHAFT								
1.	1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.							
2.	This R	EPORT consists	of a total of	5	sheets, including	this cover sheet.		
3.	This re	eport is also accor	mpanied by Al	NNEXES, comprising	:			
	a. 🔀	(sent to the	applicant and	to the International Bi	ureau) a total of 2	sheets, as follows:		
	sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or							
	sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).							
	sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental							
	, г	Box.	T	D 1	C. Park A. a. a. I. a. I. a.			
	b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))							
	, containing a sequence listing and/or tables							
	related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).							
4.	This re	eport contains ind	ications relatio	ng to the following ite	ms:			
	\boxtimes	Box No. I	Basis of the	eport				
		Box No. II	Priority					
		Box No. III	Non-establis	shment of opinion with	n regard to novelty, inventi	ve step and industrial applicability		
		Box No. IV	Lack of unit	y of invention				
	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement							
	Box No. VI Certain documents cited			uments cited				
	Box No. VII Certain defects in the international application							
	Box No. VIII Certain observations on the international application							
Date of s	submiss	ion of the deman	d		Date of completion of thi	s report

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box	No. I	I	Basis of the report						
1.	With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.								
		-	report is based on translations from the original language into the following language and is the language of a translation furnished for the purposes of:						
		int	international search (Rule 12.3 and 23.1(b))						
		L pu	blication of the international application (Rule 12.4))					
		int	ternational preliminary examination (Rule 55.2 and/	or 55.3)					
2.	recei		regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the ing Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to port):						
		the inter	national application as originally filed/furnished						
	\boxtimes	the desci	ription:						
		pages	1-12		as originally filed/furnished				
		pages*		received by this Authority on					
		pages*		received by this Authority on					
	\boxtimes	the clain	ns:						
		nos.	2-8,10-13		as originally filed/furnished				
		_		as amended (together					
			1,9		07.07.2005 with letter				
		_							
	\square			received by this radiiority on _	,				
		the draw							
		sheets			as originally filed/furnished				
		sheets*		•					
		sheets*		received by this Authority on					
	Ш	a sequen	equence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.						
3.	Ш	The ame	amendments have resulted in the cancellation of:						
		L the	e description, pages						
		L the	the claims, nos.						
		the	the drawings, sheets/figs						
		the	the sequence listing (specify):						
		an	y table(s) related to sequence listing (specify):						
4.			oort has been established as if (some of) the amend we been considered to go beyond the disclosure as fil						
		the	e description, pages						
			e claims, nos.						
			e drawings, sheets/figs						
			e sequence listing (specify):						
		any table(s) related to sequence listing (specify):							
*	If ite	m 4 appli	es, some or all of those sheets may be marked "supe	erseded."					

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V		Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1.	Statement					
	Novelty (N)	Claims	1-13	YES	
			Claims		NO	
	Inventive st	tep (IS)	Claims	1-13	YES	
			Claims		_ NO	
	Industrial a	pplicability (IA)	Claims	1-13	YES	
			Claims		NO	

2. Citations and explanations (Rule 70.7)

1.1 Prior art

The invention relates to a subscriber line circuit and a communications system as defined in the preambles of independent claims 1 and 9, respectively. US 2003/091032 (document D1) describes a circuit for connecting subscriber terminals, comprising network—side communication means for connecting to a packet network and subscriber—side communication means for connecting to subscriber terminals, with bidirectional conversion of the transmitted information. However, on the network side there is uniform signalling (H.248), and so the usability of such a circuit is restricted because the subscriber line circuit can only be connected to one particular type of network element.

1.2 Problem addressed

The present invention therefore addresses the problem of how to improve the usability of a subscriber line circuit so that it can be connected to various types of network element.

1.3 Solution

The problem is solved by equipping the subscriber line circuit

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/051972

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

with a plurality of different protocol means for communicating with different types of network element.

1.4 Conclusions

The subject matter of independent **claims 1 and 9** is neither anticipated by nor obvious from the prior art, and therefore meets the PCT requirements in respect of novelty and inventive step (PCT Article 33(2) and (3)). **Claims 2 to 8 and 10 to 13** are dependent on claims 1 and 9 and are therefore also novel and inventive. The subject matter of **claims 1 to 13** is clearly also industrially applicable (PCT Article 33(4)).

PCT/EP2004/051972

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

- 2.1 Contrary to the requirements of PCT Rule 5.1(a)(ii), the description does not cite document **D1** and also fails to give an account of the relevant prior art disclosed therein.
- 2.2 Claims 1 and 9 are drafted in the two-part form, but the following features should not have been placed in the characterising parts of the claims because they are disclosed in document D1 together with the features set out in the preambles (PCT Rule 6.3(b)):
 - means for connecting to a packet network
 (figure 10: 18);
 - means for bidirectional conversion of the information transmitted by the subscriber-side communication means from and to the subscriber terminals into the information transmitted by the network-side communication means from and to the communications system (paragraphs [0133] and [0151]).
